For companies with up to 25 seats

ESET

Proven. Trusted.

Simplify the management of network security with ESET Small Office Security Pack, optimized for the business environment. Designed for companies with up to 25 seats, your data, communications and critical infrastructure are secured on multiple levels across all platforms. With ESET, you have a pioneer of the antivirus industry on your side with 25 years of experience.

3 Great Reasons to Choose ESET Small Office Security Pack

1. Easy to Manage

With ESET security products' easy installation and setup, your company security is covered within minutes. It no longer takes a bunch of IT professionals to run your company's IT security – but from our remote management console, your company security can be tweaked to every last detail.

2. Cover All Bases

Deploy security on a range of computer and server platforms running Windows, Mac and Linux operating systems. In addition, ESET Small Office Security Pack include support for the most widespread mobile platforms (Android, Symbian, Windows Mobile) to secure your mobile fleet.

3. Flexible as You Are

Take advantage of the flexibility of ESET Small Office Security Pack. Anytime you decide to acquire new computers or mobile devices for your business, you can easily upgrade, enlarge or renew your security license.

ESET offers two security packs for companies with up to 25 seats. ESET Small Office Security Pack covers computers, smartphones, and fileservers, and ESET Small Business Security Pack version also includes mailserver protection on top of that.

Endpoint Security

ESET Endpoint Security

ESET Endpoint Antivirus

ESET NOD32 Antivirus Business Edition for Mac OS X

ESET NOD32 Antivirus Business Edition for Linux Desktop

Antivirus and Antispyware	Eliminates all types of threats and spyware.
Host-based Intrusion Prevention System (HIPS)	Enables you to define rules for processes, applications and files.
Device Control	Blocks unauthorized media and devices from the system.
Auto-Scan of Removable Media	Allows you to scan devices and media for malware.
Web Control	Limits website access by category or created rules.
Trusted Network Detection	Stricter protection when clients connect to new network.
Two-way Firewall	Anti-hacker and data exposure prevention.
Client Antispam	Effectively filters out spam on the user's endpoint device.
Component-based Installation	Install any or all of these security components: firewall, antispam, web control, device control, Microsoft NAP support, and web access protection.
Cross-platform Protection	Eliminate malware targeting Windows, Mac and Linux endpoints.
Low System Demands	Leaves more system resources for programs you use daily.
Multiple Log Formats	Lets you save logs in common formats (CSV, plain text, Windows event log).
Update Rollback	Lets you revert to a previous version of protection modules.

File Security

ESET File Security for Microsoft Windows Server

ESET File Security for Microsoft Windows Server Core

ESET File Security for Linux / BSD / Solaris

Antivirus and Antispyware	Eliminates all types of threats including viruses, rootkits, worms and spyware.
	Provides real-time on-access scanning of the server-stored data.
Cross-platform Protection	Eliminates malware targeting Windows, Mac and Linux operating systems.
Low System Demands	Delivers proven protection while leaving more system resources for the server's vital tasks.
Smooth Operation	Automatically detects server roles to exclude critical server files like data stores and paging files from on-access scanning to decrease overhead.

Please note that the functionality varies depending on the OS. More info at **eset.com**

ESET

Mobile Security

ESET Endpoint Security for Android
ESET Mobile Security Business Edition for Symbian
ESET Mobile Security Business Edition for Windows Mobile

Remote Lock	Blocks the phone remotely to prevent access to your data.
Remote Wipe	Deletes all phone-stored data remotely using an SMS.
GPS Localization	Remotely locates the phone using a remote SMS command and tracks the phone's GPS coordinates.
SIM Matching	Notifies you and automatically locks the device in case of unauthorized SIM insertion.
Call Blocking	Blocks unwanted calls – incoming and outgoing.
Uninstall Protection	One password controls it all. Only authorized persons will be able to uninstall ESET Endpoint Security for Android (version 2.2 and higher).
SMS/MMS Antispam	Blocks messages from blacklisted or unknown numbers.
Real-time Protection	Secures all applications, files and memory cards in real-time.
Security Audit	Checks battery level, home network and running processes.
On-demand Scanning	Reliable scanning and cleaning of integrated memory and media.
Remote Administration	Stay up to date on mobile fleet security and push policies remotely.
Administrator Message	Push a custom text to devices with an assigned level of importance.

ESET Remote Administrator

Remote Administration	Manage servers, endpoints, smartphones and virtual machines from a single console.
Real-time Web Dashboard	Makes network and security status available from anywhere.
Dynamic Client Groups	Create static and dynamic client groups for easier policy enforcement.
Event Notifications	Specify log and report parameters or choose from more than 50 templates.
Randomized Task Execution	Set random time periods for scheduled security tasks.
Local Update Server	Downloads updates to a local mirror server, minimizing Internet bandwidth.

Please note that the functionality varies depending on the OS. More info at **eset.com**
